

Website Design, Internet Marketing, and Software Development

VistaWorks:

VistaWorks has been providing Internet Marketing and Website Design services since 1995, with clients from Colorado to the Asian Pacific. We pride ourselves on outstanding customer service, and professional website design. When you call us, a real live person will answer your call, and from that point on we will work to make sure your business succeeds. Whether you are just getting started, or need to deploy a sophisticated website and internet marketing campaign, we have the experience and resources necessary to make it happen. We work with you hand-in-hand to help your business succeed.

Job Description – Website Designer:

VistaWorks is seeking a website designer to meet the demands of its ever-growing website design business. This website designer will be responsible for making changes to existing websites, designing new websites, content management of websites, and various other graphical design and programming projects. Must be able to juggle the design and implementations of multiple websites at once. VistaWorks manages websites for hundreds of existing clients as well as having a large queue of website designs for new clients continually.

Website Conceptualization and Graphic design: 60%

Website Programming (HTML, CSS, etc): 20%

General marketing responsibilities

(copy writing, content organization, video editing, etc.): 20%

Recommended Qualifications:

The successful candidate will possess the following:

- Portfolio with breakthrough Web & Graphic design
- Expert experience in web site development
- Strong and creative Web portfolio
- Outstanding leadership, planning and problem-solving skills
- Strong background in commercial web product development
- Working knowledge of ASP, .NET, PHP, SQL
- Expert knowledge of HTML, CSS, Flash, Photoshop, video editing tools, technical design and writing, and development standards.

- Bachelor's Degree or Associate's Degree in web development, design, or related area.
- Minimum of 2 years of recent experience as a web developer/graphic designer. The web development skills required for this position are those of a mid level developer.
- Experience writing website content or other content such as product demonstrations.
- Detail oriented, and results driven.
- Experience with or familiarity with search engine optimization (SEO) concepts a major plus.

Compensation:

VistaWorks provides a salary and benefits package that is very competitive. Pay is based on experience.
